## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bardos et al. (U.S. Patent # 4,217,632) in combination with Hester (U.S. Patent # Re.31, 704) and Fujiyoshi et al. (U.S. Patent # 6,636,140).

Bardos et al. discloses the claimed subject matters a switching power supply (figure 1 and 4-6), including a plurality of capacitor connected in series with each other are connected with input terminals of a plurality of switching power supplies each having a switching element, a transformer, a rectifier (figure 1, items 22-23,14-15,21and 26-27). However Bardos et al. does not disclose the utilization of the similar technique for a transformer having secondary winding of the windings is formed of one single one-turn coil and a stack of planer topology. Hester teaches the utilization of the similar technique for a transformer having secondary winding of the windings is formed of one single one-turn coil (figure 4) and Fujiyoshi et al. teaches the utilization of similar technique for a stack of planer topology (figure 2). It would have been obvious one having ordinary skill in the art at the time the invention was made to modify Bardos et

al.'s power supply by utilizing the technique taught by Hester and Fujiyoshi et al. for the purpose of providing an improved power supply with increased efficiency and cost effectiveness.
